In 1939, 52 irrigation objects were constructed in the Uzbek SSP including the 270 km. long Fergan Canal.

The Vakshskaia irrigation system which irrigates 22,000 hectares of new land and supplies permanently water for 72,000 hectares of old knd, has been put in operation.

At the Gisarskaia valley a 41 km. long irrigation canal was built in 50 days.
